The 20 % national co-financing for Bulgarian beneficiaries is ensured from the state budget. Beneficiaries shall ensure the needed own contribution (public and/or private), if applicable.

An indicative budget allocation (EU & National Funds) to the programme priorities and to the specific objectives is presented in Annex I – Table 2. When selecting projects to be funded, such allocation may be adapted by the Monitoring Committee (MC) according to programme needs. Projects may be selected up to **100%** of the budget of the present Call for Project Proposals, if deemed necessary.

3. CONTEXT OF THE CALL

The present Call concerns the Targeted Project foreseen, in the Programme Document, to capitalise the results and possible territorial expansion of the operation of the 2014-2020 project FLOOD GUARD: Increasing the capacity to respond to disasters and emergencies in the cross-border region of Bulgaria and Greece.

The programme area is sensitive to climate related natural disasters. It is highly vulnerable to floods, landslides, forest fires and heatwaves. Socio-economic, health, and environmental impacts are significant and threaten the local communities. Climate Change Adaptation has territorial aspects that know no administrative borders. The aim of the specific objective is to improve resilience of ecosystems and communities to the effects of climate change and enhance cross-border risk prevention and response mechanisms. The focus is on river valleys that are susceptible to overflows of their flood bed in times of heavy rainfall, mountain areas facing landslides or threatened by forest fires during the hot and dry season and cities affected by urban heat and dust.

Therefore, the Interreg VI-A Greece-Bulgaria programme 2021-2027 will support, through the present Call, cross border cooperation to enhance capacities for an effective climate resilience and adaptation. As climatic phenomena and effects do not know borders, the main aim of the Targeted Project is to enhance through cooperation a territorial integrated approach. Cooperation fields can include both managerial (including information exchange and security plans) and infrastructure actions.

More specifically, through present Call, may be funded activities such as (indicatively):

·Cooperation plans, protocols, infrastructures, and equipment for effective risk treatment, including digital solutions.

Expected results of the proposed Project:

Cooperation actions should increase the (technical and administrative) capacity for more efficient and timely response to different types of natural disasters. Equipment should improve the effectiveness of immediate and targeted respond to disasters and emergencies (limiting the exposure of the population).

CBC Added Value / synergies with other forms of support: Confrontation of Climatic risk is a common challenge The Cooperation activities and joint initiatives will support the interoperability of national systems and better coordination in prevention, control and improved response to natural disasters and therefore enhance the effectiveness. Cooperation will motivate organisational and policy learning processes and more improved efficiency.
